CHARACTERISTICS

Fertilizer with organic liquid amino acids. Organic complete fertilizer with a significant amount of organic nitrogen of biological origin. Ideal for use in organic farming as a source of organic nitrogen. The product also contains phosphorus and potassium as well as sulfur which make it a complete product in use for organic production plants. Nitrogen is found in the form of amino acids that give it an important biostimulant effect in times of cold stress or lack of water. The product also provides a significant part of organic matter for soil as it promotes the absorption of nutrients already present in the soil, as well as the development of beneficial soil microorganisms, which end up reversing into a healthier plant with growth.
