

POTASER 42N

Manufacturer: Mapryser, S.L.

Ref. 180628.00

Description: Fertilizer. Potassium Solution.

PHYSICAL PROPERTIES

Appearance: Liquid
pH (1% in water): 7,5 +/- 0,5
Specific Weight (20°C): 1,57 g / cm³

COMPOSITION (w / w)

Potassium Oxide (K₂O) soluble in water: 42.00% (66 % w / v)

CHARACTERISTICS

POTASER 42N is a potassium fertilizer at neutral pH with a high efficiency as a source of potassium for plants. It has been designed specifically to have a high stability even in alkaline waters and soils. The product is a stable source of potassium thanks to the organic carboxylates which stabilize it and make it a very absorbable source of potassium for plants. The organic carboxylates have also an additional effect promoting root development and improving hygienic conditions in the soil. It is recommended to be used in all cases of potassium requirement by plants, specially in maturation period.

CROPS

It is recommended to be used in all crops.

RECOMMENDATIONS FOR USE

It is recommended to apply by fertigation or foliar. It can be mixed with any other form of fertilizer or phytosanitary, with the exception of products of acid reaction.

DOSAGE

FERTIRRIGATION: 2,5-4,0 Liters / Ha and application. Minimum of 2 to 3 applications.
FOLIAR: 35-100 cc / Hl. Minimum of 2 to 3 applications.

CONTAINERS

Containers IBC of 1000 liters, bottles of 20 and 5 liters, and bottles of 1 liter.

T-Agriser

Se recomienda no exceder las dosis aconsejadas.
