CHARACTERISTICS

SERSALT PLUS is a proprietary blend of organic dispersing agents which solubilize Calcium and Magnesium which substitute Sodium in the soil micella. Sodium is released and it is easily solubilized and lixiviated by irrigation water. The product increases the number of stable aggregates of soil particles improving the aeration capacity and the water retention. These changes in the soil improve the seed germination and the development and growth of the root system of plants.

CROPS

It is recommended in all type of crops.
