## CHARACTERISTICS

Organic PK fertilizer. Phosphorous and Potassium are in a form which is fully soluble, thanks to being produced by a microbial fermentation process of vegetable substrates. The product contains a big amount of organic substances coming from the fermentation process which help stimulate the root and the plant in its development, together with antioxidants which improve immunity of the plant. The benefit for the plant is very important and the farmer saves in bio-stimulant products for the root and the plant, while using this PK nutrients.. Phosphorous and Potassium of the product are 100% organic, the product does not contain heavy metals and the pH is neutral. It can be combined with ECOSER N, ECOSER P and ECOSER triple to obtain the desired levels of Nitrogen, Phosphorous and Potassium in the irrigation.
